

AdventOfCTF - Badge Collector #1

Challenge

15 Solves

Badge Collector #1

100

Did you get all the badges? There is more to them than meets the eye.

This challenge does not have its own badge, nor does it get additional points for the top 10, but who doesn't want 100 extra points?

DominicBreuker/stego-toolkit

This project is a Docker image useful for solving Steganography challenges as those you can find at CTF platforms like hackthebox.eu. The image comes pre-installed with many

 <https://github.com/DominicBreuker/stego-toolkit>

To install i've used docker:

```
docker run -it --rm -v $(pwd):/data dominicbreuker/stego-toolkit /bin/bash
```

Let's run exiftool on every image.

```
for filename in $(pwd)/*; do echo $filename >> out.txt ;exiftool $filename >> out.txt  
; done ;
```

In the badge of the 24 challenge we find this string of text in the untilnextyear

```
Thank you for playing Advent of CTF. I had a great time creating these challenges. I  
hope you had a great time solving them!..You can enter this flag for the challenge  
"Badge Collector #1": untilnextyear
```
