AdventOfCTF - Badge Collector #2

To install i've used docker:

```
docker run -it --rm -v $(pwd):/data dominicbreuker/stego-toolkit /bin/bash
```

Let's run pngcheck on evey image.

```
for filename in $(pwd)/*; do pngcheck $filename; done;
```

```
....
/data/c1f93b6ee2e1cd25ea02f9a78c364b12.png  additional data after IEND chunk
ERROR: /data/c1f93b6ee2e1cd25ea02f9a78c364b12.png
....
```

c1f93b6ee2e1cd25ea02f9a78c364b12.png throws an error. Let's run strings on it.

```
strings c1f93b6ee2e1cd25ea02f9a78c364b12.png
```

```
So far the challenge has been all about web application security. But these badges are quite something! Level 20 is a great point to add something in the mix don't you think?
This puzzle does not have a badge, nor does the top 10 get additional points, but who doesn't like 100 extra points?
Badge Collector #2: thisisgreatfun
```
